Summary

A 4th-year computer science student embarking on a lifelong journey as a tech learner and advocate. Shipped applications with different teams and has various field experience from a recent internship. Has a deep sense of responsibility and eagerness to learn and innovate, turning ideas into actual tangible and explainable products. Deeply interested in AI and the evolving tech as well as curious about legacy systems and transformation.

Experience

HYT Foundation (Helping Youth Transcend Foundation Inc.) Quezon City, NCR
Technology and Innovation Intern June 2026 – August 2026

- Developed a learning management system for HYT Global Institute on a low-cost stack of Cloudflare Pages, Supabase, and Cloudflare R2; managed the GitHub repository and deployment for the intern management system.
- Wrote infrastructure proposals for the 5-floor HYT Business Center, covering ISP selection with a dual-WAN backup, domain and DNS setup, and a Cat6 and PoE network hardware plan.
- Built five (5) QR-based registration/booking systems for partner companies.
- Led and guided a small team of other Technology and Innovation Interns to manage company repositories, projects, documentation, quality assurance, and more.

Projects

sana.AI | *1st Place, UST CICS CodeWarts Hackathon* (Github Repository) May 2026
Next.js, TypeScript, Tailwind CSS, FastAPI, Python, OpenAI Whisper, GPT-4o, XLM-RoBERTa, Supabase

- Led a team of 4 to build a voice-powered career guidance app in 2 days for Filipino informal workers without formal credentials.
- Built the AI pipeline that turns spoken work stories in English, Filipino, or Taglish into skills assessments and TESDA certification roadmaps, starting with the Welding SMAW NC II pathway.
- Fine-tuned an XLM-RoBERTa model for multilingual intent classification and designed the initial UI.

ShopZada Data Warehouse | *Data Warehousing Capstone* (Power BI Screenshots) Dec 2025
Python, Pandas, PostgreSQL, Docker, Apache Airflow, Power BI

- Designed a hybrid ETL pipeline for a multi-department e-commerce dataset, run with Apache Airflow in Docker, and wrote all data cleaning scripts.
- Built a Kimball star schema with SCD Type 2 to keep an accurate history of changing records across departments.
- Created Power BI dashboards that show key business KPIs.

Dolly's Closet | *Fashion E-Commerce Website (dollysclosetph.com)* Sep 2025 - May 2026
Next.js, React.js, Tailwind CSS, Supabase, Google Analytics

- Built a live, fully responsive online store catalog for a local clothing *"ukay-ukay"* store with a product catalog, filters, and brand identity incorporated into its design.
- Set up Supabase for inventory, order management, real-time updates, and secure login.

Education

University of Santo Tomas Manila, Philippines
Bachelor of Science in Computer Science, Specialization in Data Science Expected June 2027

- Consistent Dean's Lister
- **Relevant Coursework:** Data Warehousing, Machine Learning, Data Analysis and Visualization, Software Engineering, Web Development, Mobile App Development, Graphics Computing

Leadership & Activities

- **UST Computer Science Society**, *TechDev Staff*
- **Hackathons:** UST CICS CodeWarts (1st Place), BPI DataWave 2025, GCash ImaGnation 2025, Hackfest 2025

Skills

Languages: Python, JavaScript, TypeScript, SQL, Java, Rust, HTML/CSS
Frameworks & Libraries: React.js, Next.js, Node.js, FastAPI, Flutter, Tailwind CSS, Bootstrap, Pandas, NumPy, Scikit-learn, XGBoost, Matplotlib
Data, Cloud & DevOps: PostgreSQL, MySQL, Supabase, Cloudflare (Pages, R2), Docker, Apache Airflow, Kestra
AI: OpenAI API, Whisper, Hugging Face, sentence-transformers, VectorDB
Tools: Git, GitHub, Figma, Power BI, Excel, Trello
